Healthcare Solutions

OxfordEME is a part of K Care Healthcare Solutions

Established in 1976, K Care Healthcare Solutions is an Australian owned, family business, that manufactures, distributes and sells a broad range of healthcare products to Hospitals, Residential Aged Care and Community Care for both Australian and International markets.

Working closely with healthcare professionals, K Care Healthcare Solutions has developed trusted brands that provide an extensive range of products that meet and exceed requirements demanded in healthcare environments today. Our products have a reputation for being aesthetically pleasing in design, highly functional and long-lasting.

With a team made up of some of Australia's most knowledgeable and experienced trade professionals, K Care Healthcare Solutions offer excellent support right across the country. We have a proven track record of delivering equipment solutions within tight timeframes to the Aged Care Facilities, Hospitals, Occupational Therapists, Health Care Centres and other service providers.

With values based on integrity, respect, leadership, passion and accountability, our customers have confidence knowing that they are dealing with a company that has customer satisfaction at the core of everything we do.

**Warm Regards,
The OxfordEME Team**

WHAT SETS US APART?

We are in a unique position within the manufacturing industry to offer a large range of customisable services and benefits.

Customised equipment to your requirements

Our domestic manufacturing operations key point of difference is the ability to tailor equipment to suit individual needs of a particular customer.

Stainless steel can be powder coated in any colour

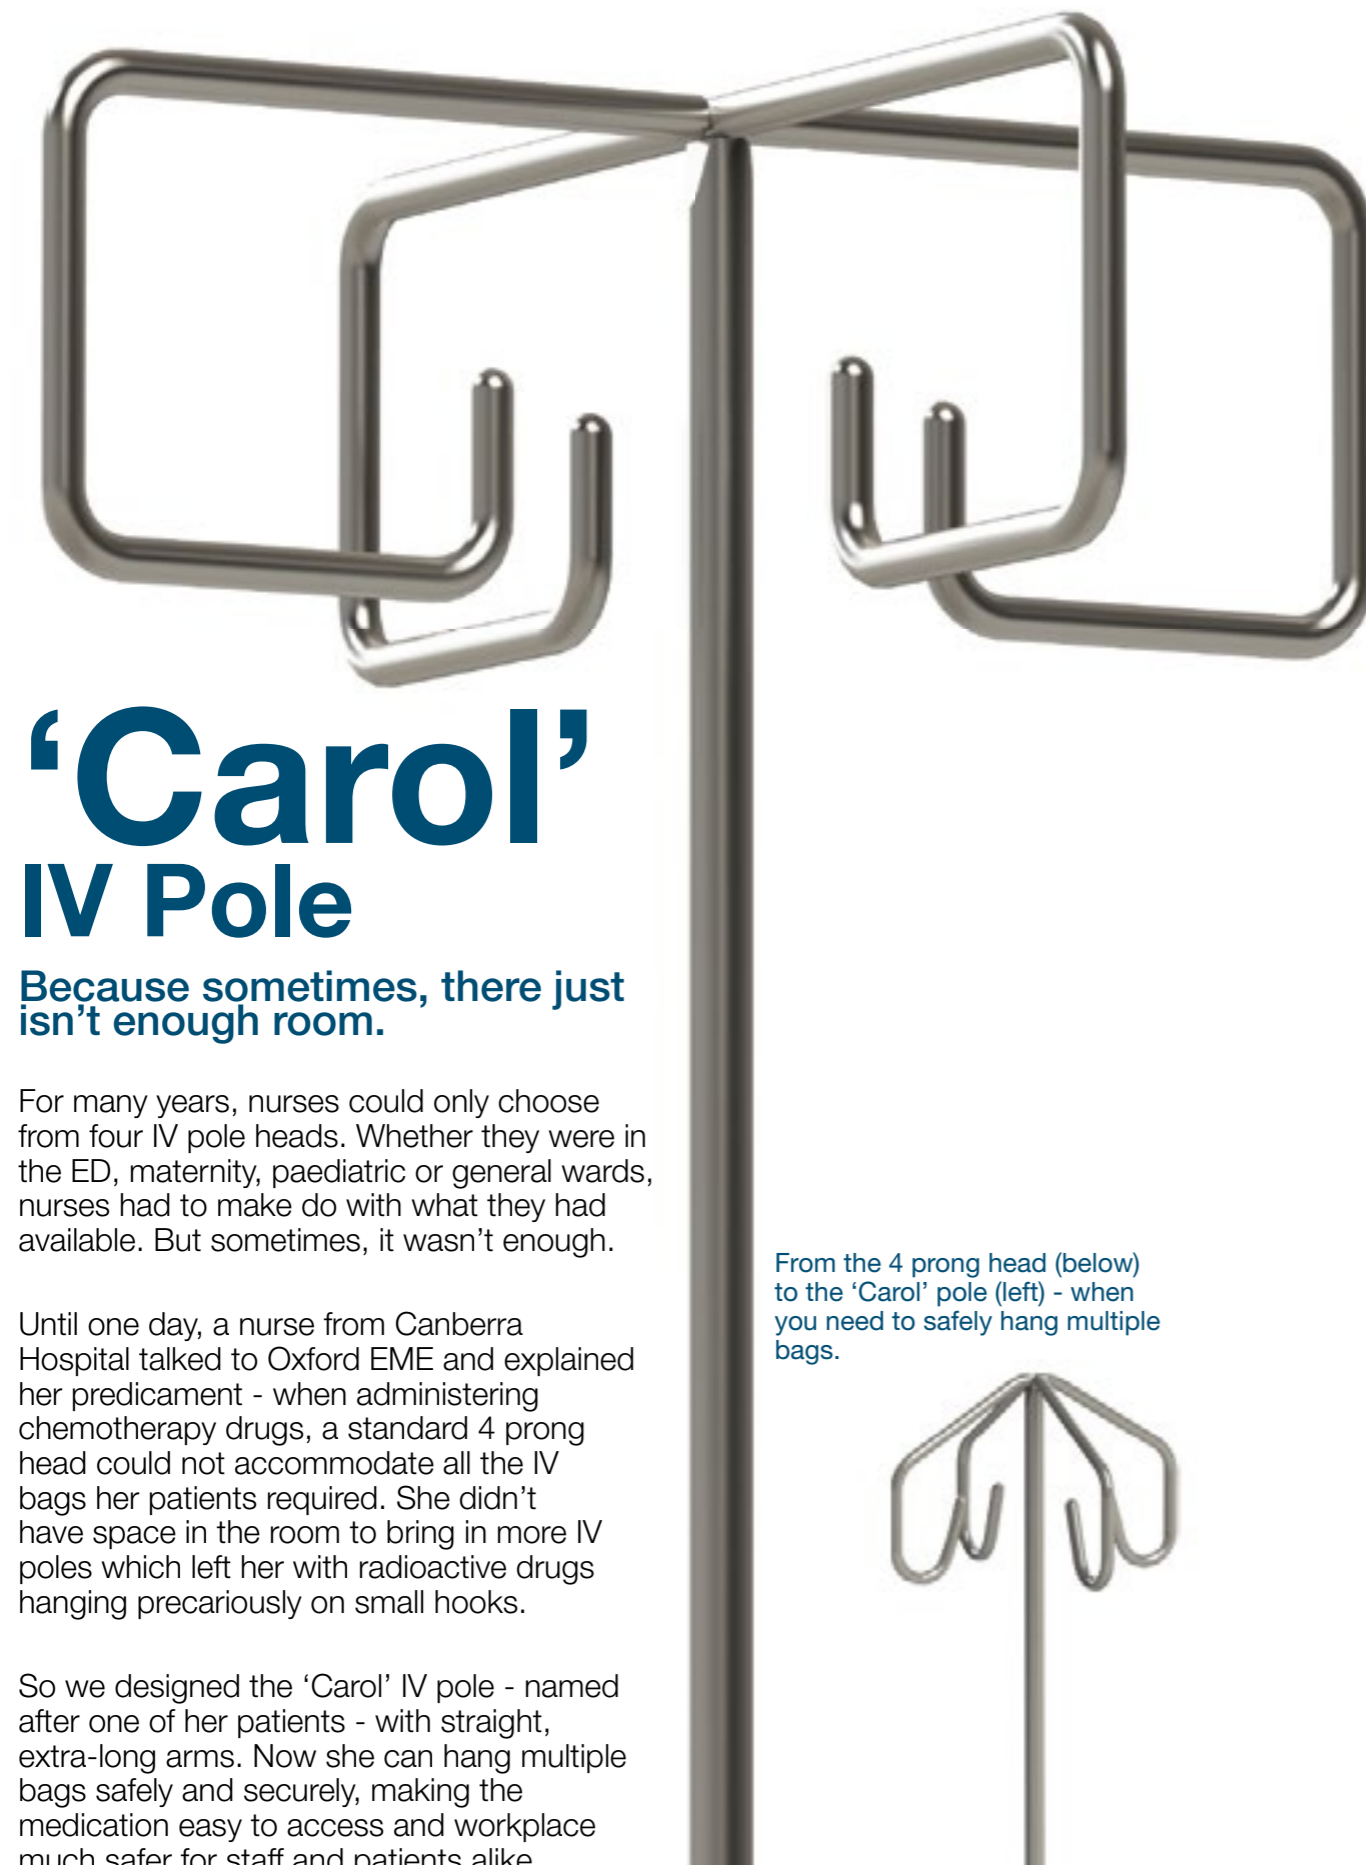

We can powder coat any stainless steel product any colour to suit your needs or requirements! If your organisation needs a specific colour for compliance, procedures, or just to fit aesthetics, we can help!

Australian Made

OxfordEME products are Australian made in our Sydney manufacturing site; this ensures each piece of equipment is quality assured to the highest standard by our manufacturing staff.

'Carol' IV Pole

Because sometimes, there just isn't enough room.

For many years, nurses could only choose from four IV pole heads. Whether they were in the ED, maternity, paediatric or general wards, nurses had to make do with what they had available. But sometimes, it wasn't enough.

Until one day, a nurse from Canberra Hospital talked to Oxford EME and explained her predicament - when administering chemotherapy drugs, a standard 4 prong head could not accommodate all the IV bags her patients required. She didn't have space in the room to bring in more IV poles which left her with radioactive drugs hanging precariously on small hooks.

So we designed the 'Carol' IV pole - named after one of her patients - with straight, extra-long arms. Now she can hang multiple bags safely and securely, making the medication easy to access and workplace much safer for staff and patients alike.

From the 4 prong head (below) to the 'Carol' pole (left) - when you need to safely hang multiple bags.

INSTRUMENT TROLLEYS

- Optional rails
- 2 shelves with 48cm clearance or 3 shelves with 30cm clearance
- Wheels: standard 7.5cm diameter
- Strong but lightweight welded construction
- Standard colour blue weave
- Manufactured from 304 grade stainless steel with satin finish

Emergency Paediatric Trolley

Equipment needs to multi-task

Need an emergency trolley that can act as a paediatric trolley? Too easy.

One of our customers needed a trolley that could function as an emergency trolley but could also cater to paediatric requirements. So this is what we did.

We showed them what we had already, standard emergency trolleys and paediatric trolleys - and they picked out attributes of each one that suited their needs...plus they added a couple of their own.

Take the best bits of these...

... and create this!

We sketched the product, talked about it, made some changes. Then we drew a 3D image so the client could see what they were getting and talked about it some more - just to be sure we had it right. Then we manufactured it...it was that easy.

If you need something you don't see in the catalogue, give us a call and we'll talk to you about customising a product... just for you! Now, don't you feel special?

FULL WARRANTY SUPPORT FOR ALL OUR EQUIPMENT

Quality built to a standard means K Care Healthcare Solutions products are designed to last and stand the test of time in front line environments. We support this with long warranty periods and we are always willing to stand behind our products.

IN-HOUSE RESEARCH AND DEVELOPMENT

As an Australian company that designs and manufactures products, K Care Healthcare Solutions has a fulltime Research & Development (R&D) team consisting of industrial designers and engineers tasked with developing new product and improving the design of existing product.

CUSTOM DESIGN AND SPECIAL NEEDS

A key point of difference of our domestic manufacturing operations is our ability to tailor equipment to suit the individual needs of a particular customer. We can produce 1 or 1,000 of anything, a unique feature of our business that keeps us at the forefront of the healthcare equipment industry.

Our products are independently tested and listed on the Federal Governments mandated Australian Register of Therapeutic Goods. The business is a member of ATSA (Assistive Technology Services Association).

All information is considered to be true and correct at the date of publication. Changes in circumstances after the time of publication may impact on the accuracy of the information.
